Professional Experience

08/2024 – 02/2025

Simi valley,
United States

Project support engineer, Tieche

Provide business solutions to clients by delivering building automation solutions throughout every project. Visit various data centers and mobile switch hubs, leveraging advanced tools such as Distech Controls, JACE, Automated Logic, and Niagara Tridium to optimize system efficiency and performance.

01/2022

Raleigh, United States

Controls Engineer, Custom Air

Installed, programmed, and troubleshoot various Variable Frequency Drives (VFDs) using software tools such as DriveWizard and Niagara Tridium. Worked with sensors, ECM fans, and automation control systems to ensure optimal performance.

Performed electrical panel installations, wiring, and terminations, ensuring compliance with industry standards.

Conducted start-ups, commissioning, and system integration for new and existing control systems.

Diagnosed and resolved hardware and software issues in automation and HVAC systems.

Collaborated with cross-functional teams to improve system efficiency and reliability.

07/2021 – 2023

Orlando, United States

Lead Commercial Service Technician, Advanced Mechanical Services

- **Refrigerant Management:** Expertly handled and serviced systems using various refrigerants, including R-410A, R-22, R-290, and R-134a, ensuring proper handling, charging, and recovery processes.
- **Troubleshooting and Diagnostics:** Utilized advanced diagnostic tools to identify and resolve issues with HVAC and refrigeration systems efficiently, including refrigerant leaks, compressor failures, and electrical faults.
- **System Upgrades and Retrofits:** Implemented system upgrades and retrofits to improve energy efficiency and performance, adhering to environmental regulations and promoting the use of eco-friendly refrigerants.
- **Electrical and Mechanical Work:** Performed electrical and mechanical work related to HVAC and refrigeration systems, including wiring, circuit testing, and component replacement.
- **Customer Service:** Communicated effectively with clients to explain system issues, maintenance requirements, and repair solutions, ensuring high levels of customer satisfaction.
- **Emergency Response:** Responded promptly to emergency service calls, providing quick and effective solutions to minimize impact on client operations.

01/2019 – present

Remote, United States

Freelance developer, Impact Team

Developed custom Python applications for automation, data processing, and UI/UX solutions using PyQt and customtkinter.

Designed and implemented file compression, PDF processing, and cloud-based storage solutions in projects like ZipnGo.

Integrated IoT devices (ESP32-S3, Raspberry Pi 5) with cloud platforms to enable real-time data monitoring and control.

Created custom scripts for data extraction, transformation, and automation, improving workflow efficiency for clients.

Built and optimized backend solutions using Python and FastAPI, ensuring scalable and high-performance applications.
Provided technical consulting and troubleshooting for clients in automation, controls engineering, and cloud-based automation.

Education

06/2022 – 02/2024
Virginia Beach,
United States

- A.A.S Mechanical Engineering Technology, ECPI University**
- Graduated with an Associate of Science in Mechanical Engineering Technology.
 - Studied various technologies and methodologies essential to the field, with a strong focus on practical applications.
 - Gained proficiency in Computer-Aided Design (CAD) software, including AutoCAD and Autodesk Inventor, enhancing skills in designing and modeling mechanical components and systems.
 - Acquired a solid foundation in mechanical engineering principles, materials science, thermodynamics, and manufacturing processes.
 - Developed hands-on experience with Programmable Logic Controllers (PLCs), learning to program, troubleshoot, and maintain automated control systems.
 - Completed coursework and projects that emphasized real-world problem-solving and the application of engineering concepts.
 - Engaged in practical lab sessions and collaborative projects to apply theoretical knowledge to real-world scenarios.

10/2024 – present
V.A Beach,
United States

B.S Electronics Systems Engineering Technology, Ecpi University

Skills

Refrigerant Management ● ● ● ● ●

Experienced with various refrigerants, including R-410A, R-22, R-290, and R-134a.

CAD Software ● ● ● ● ●

Proficient in Computer-Aided Design (CAD) software, including AutoCAD and Autodesk Inventor, Multisims.

Work Order Management ● ● ● ● ●

Experienced in managing work orders using Yardi 1, Yardi Voyager, Service Channel, IVR, SAM-Pro, Servus Connect and TechAnywhere.

Development

Programming: Python (PyQt, customtkinter, FastAPI), C++, JavaScript (basic)

Automation & Controls: PLCs, HMIs, SCADA, Modbus, BACnet, MQTT

Electrical & Hardware: VFDs (Variable Frequency Drives), ECM fans, sensors, wiring, panel installations, terminations

Software & Tools: DriveWizard, Niagara Tridium, Grafana, InfluxDB

Cloud Technologies: AWS (IoT Core, S3, Lambda),

Google Drive API integration IoT & Embedded

Systems: Raspberry Pi, ESP32-S3, microcontrollers

Electrical and Mechanical Repairs ● ● ● ● ●

Skilled in diagnosing and repairing electrical and mechanical issues in HVAC and refrigeration systems.

Team Leadership ● ● ● ● ●

Supervising and mentoring teams more than five junior technicians, fostering skill development and high-quality work.

Refrigeration Systems ● ● ● ● ●

Proficient in the installation, maintenance, and troubleshooting of commercial refrigeration systems, including walk-in coolers and freezers.
