Profile

Building Automation and technology professional with 7+ years of experience spanning HVAC installation, commercial/residential service, DDC controls, system integration, networking, and software development. Experienced with Tridium Niagara, BACnet, Modbus, TCP/IP, HVAC control systems, Python, FastAPI, JavaScript/TypeScript, REST APIs, and databases. Combines hands-on field expertise with backend engineering skills to troubleshoot, integrate, and develop systems across equipment, controls, networks, and software. Seeking opportunities in Building Automation, Controls Engineering, Backend Development, IoT, Systems Integration, and related automation technologies.

Professional Experience

2025/04 – Present
Raleigh, United States

Controls Technician

Envirotrol

- Program, configure, commission, and troubleshoot DDC/BAS systems for AHUs, RTUs, VAVs, boilers, heat pumps, and VFDs.
- Diagnose HVAC controls, electrical, mechanical, and network issues using BACnet, Modbus, TCP/IP, and point-to-point testing.
- Configure control sequences and integrate HVAC equipment using Tridium Niagara while coordinating commissioning and documenting system performance.

2024/08 – 2025/02
Simi Valley,
United States

Project Support Engineer

Tieche

- Delivered, configured, and commissioned BAS/DDC solutions for data centers and mobile switching facilities.
- Integrated and troubleshoot Distech Controls, JACE, Automated Logic, Niagara Tridium, BACnet networks, sensors, actuators, and HVAC equipment.
- Performed point verification, system testing, and field diagnostics while collaborating with engineers and clients to ensure reliable system operation.

2023/08 – 2024/06
Raleigh, United States

Factory Controls Technician

Custom Air

- Installed, serviced, and troubleshoot commercial HVAC and control systems, diagnosing electrical, mechanical, and controls-related issues.
- Configured VFDs and worked with BACnet networks, IP addressing, energy management systems, and HVAC controls.
- Performed system diagnostics using wiring diagrams, P&IDs, multimeters, and digital manometers while coordinating with customers and project teams.

2021/04 – 2023/05
Fayetteville,
United States

Lead Maintenance Technician

Hawthorne Residential Partners

- Diagnosed and resolved HVAC, electrical, mechanical, and building system issues while performing preventive maintenance and inspections.
- Managed and prioritized service requests using Yardi Voyager, Yardi 1, and Servus Connect to maintain efficient building operations.

- Supervised and trained technicians, coordinated daily maintenance activities, and managed equipment and parts inventory.

2019/04 – Present
Raleigh, United States

Co Founder & Technical Lead

Impact Team Technology

- Founded and lead a technology community focused on software development, cybersecurity, design, and emerging technologies.
- Lead collaborative software projects using Python, JavaScript, TypeScript, React, APIs, and Git/GitHub.
- Coordinate and mentor developers and designers through project planning, development, testing, and deployment.

Skills

Building Automation Systems	● ● ● ● ●	System Startup & Commissioning	● ● ● ● ●
Object Orientated Programming	● ● ● ● ●	Tridium Niagara	● ● ● ● ●
Bacnet/IP	● ● ● ● ●	Network Troubleshooting	● ● ● ● ●
Backend Development	● ● ● ● ●	Database Management	
Mechanical Troubleshooting	● ● ● ● ●	Data communication	● ● ● ● ●

Education

2024/09 – present Virginia Beach, United States	B.S Electronics Systems Technology Engineering (Mechatronics Focus) <i>ECPI University</i>
2022/12 – 2023/12 Virginia Beach, United States	A.A.S Mechanical Engineering Technology <i>ECPI University</i> Focus on Mechanical engineering principles, thermodynamics and PLC programming.
